

SECRETMISSION AND OBJECTIVES STATEMENTGRILL FLAME PROGRAM

1. Objectives

- a. Assess the threat to the US posed by foreign work in applying paranormal functions.
- b. Determine which paranormal functions can be applied to military or intelligence goals.
- c. Explore all variables that affect the functions.
 - (1) Enhance the signal
 - (2) Eliminate the noise
 - (3) Determine effective countermeasures
- d. Determine the kinds of targets or intelligence goals that show the most promise for being exploited by the paranormal functions.
- e. Make recommendations as to the future of the Grill Flame program.
- f. Develop an applications program for DoD.
- g. Conduct applications investigations that will establish that DoD should:
 - (1) Abandon the area entirely
 - (2) Continue to examine the functions
 - (3) Bring effort in-house
 - (4) Both (2) and (3)
- h. Incorporate paranormal functions with other collection techniques.
- i. Continue to train and develop abilities of (subjects) to improve performance.

SECRET

j. Determine if functions can be utilized by intelligence analysts to enhance their grasp, understanding and knowledge of areas of interest.

2. Milestones

a. Year #1

- Explore the effects of the known variables on Operational Remote Viewing (ORV).

- Complete exploration of training program and develop the complete training package.

- Initiate work on refining interpretation of data.

- Establish "best use" of ORV, re target type, etc.

b. Year #2

- Begin to apply ORV technique to real targets.

- Closely interpret the results of the ORV to further refine the technique.

- Complete work on data interpretation.

- Establish a cadre of fully trained ORVs.

c. Year #3

- Apply all ORV personnel to real intelligence programs (both known and unknown).

- Develop statistical base to illustrate the effectiveness of ORV.

- Develop a program that would permit the utilization of ORV by the DoD.

- Develop a program that would result in the continual refining and improvement of the ORV technique.

SECRET

~~SECRET~~

- Establish training programs for ORV monitors and users
of ORV data.

- Develop selection criterion for acquiring ORV trainees.

3. Experiments (Year #1, 2 and 3)

- All should be relatable to goals of contract and be aimed
at achieving the year's milestones.

- Should be established that the experiment will produce the
type of data required.

- Experimental designs, ongoing progress and results of
experiments should be cleared by primary Contracting Officer's Technical
Representative (COTR).
